MetroVault is a handy utility that provides secure storage, search and retrieval capabilities and professional level revision control for all files from documents and spreadsheets to photos and music. It is capable of storing searchable attributes and description text to all items stored allowing rapid access and retrieval at any time. MetroVault products also incorporate proprietary Triple-Sec security technology to ensure no knowledge assets or other data is lost in the case of a physical disk crash. MetroVault was conceived out of a need to manage the volume of data that each individual receives via their PC and the growing demands to work in a competing world of desktop applications and the web. Every individual builds their own computing 'ecosystem' which reflects their own needs and desires to interact with others via e-mail and social networks and to keep track of information which interests them from the wealth of sources available on the internet. At all times keeping their own information, such as user names and passwords, safe and secure. MetroVault responds to those needs by providing a safe and secure place to store all personal information but making it
